EXPERIENCE

Senior Analytics Engineer | *Juniper Square*

Feb 2026 – Present

- Partner with Product, Data Platform, and Client Success teams to build analytics systems and metric frameworks tracking engagement, activation, and retention across GP and LP users of the investment management platform.
- Design and maintain **LookML** semantic models, **dbt** transformations, and **Looker** Explores/dashboards exposing funnel, cohort, and usage metrics to Product and Leadership stakeholders.
- Own event tracking and tracking plans for key platform workflows, partnering with Engineering to maintain data quality and metric governance across the semantic layer.
- Developed dashboards enabling Product Leadership to monitor customer behaviour.
- Build and optimize dimensional data models on **Amazon Redshift**, **AWS S3**, and **GCP**, orchestrating pipelines with **Apache Airflow** to support SQL-driven analysis of large volumes of user and account data.
- Apply AI-assisted analytics, including **Claude**, **Cursor**, and **GitHub Copilot** for natural-language reporting, to accelerate SQL/LookML development and documentation.

Senior Analytics Engineer | *Veve (Contract)*

Aug 2025 – Feb 2026

- Owned product analytics for Veve's B2C mobile app, building metric frameworks for activation, engagement, retention, and monetization across the user lifecycle.
- Designed and built **dbt**, **Looker**, and **LookML** pipelines on **Amazon Redshift**, **AWS S3**, and **GCP**, using **Apache Iceberg** table formats for versioned, large-scale storage, modeling funnels and cohorts to track user progression from install through paid conversion and churn.
- Established event tracking and tracking plans for key in-app actions, partnering with Engineering to maintain data quality and metric governance across the semantic layer.
- Analyzed A/B tests across onboarding, activation, and monetization, applying statistical interpretation of experiments to guide product and growth decisions.
- Built dimensional data models and reusable dbt transformations to support SQL-driven analysis of large volumes of user event data, including LTV and retention curves.
- Used AI-assisted tools including **Claude**, **Cursor**, and **GitHub Copilot** for natural-language reporting and to accelerate SQL/LookML development, documentation, and debugging.

Data Analyst | *Jiva Ag*

Aug 2022 – Aug 2025

- Built Jiva Ag's analytics systems and metric frameworks from scratch, partnering with **sales**, **product**, **marketing**, and **engineering** to define funnel, cohort, activation, and retention metrics for the app.
- Established **Clevertap** and **Mixpanel** event tracking and tracking plans, driving data quality and metric governance across engagement, churn, and drop-off analysis, and using platform APIs to power personalized user experiences.
- Spearheaded data engineering initiatives from scratch, leveraging **dbt** for transformation, **Apache Airflow** for orchestrating ETL workflows, **Amazon Redshift** and **AWS S3** for cloud data warehousing and storage, and **Fivetran** for automated data ingestion, supporting SQL mastery over large volumes of user and behavioral data.
- Analyzed **A/B** tests across pricing and engagement experiments, applying statistical interpretation to guide product and business recommendations.
- Implemented a SARIMAX model in **Python** for Feedmill price forecasting, developing and deploying a Heroku Flask app with **CircleCI** integration to support data-driven pricing decisions.
- Independently analyzed CX Survey results, translating hands-on analysis of engagement and retention data into concrete product improvement recommendations.
- Collaborated with the Product, Engineering, Strategy and Marketing teams to analyse Product KPIs, User behaviours, Funnel Analysis, Track retention/stickiness to improve engagement and conversion on the app.
- Developed dashboards on **Metabase** and **Looker** with **PostgreSQL** tailored for Business, Operations, Product, and Design teams.
- Routinely debugged SQL queries and data pipelines, collaborating across teams to maintain data integrity and performance.

- Designed and implemented dimensional data models (star, snowflake, and hybrid schemas) and a semantic layer to enable efficient, governed reporting and analytics, ensuring scalability and data consistency across the organization.

Data Insights Analyst II | *MoneyGram International*

Feb 2021 – Jul 2022

- Developed KPIs, dashboards, and provided analysis and insights from data using a **GCP**-hosted data warehouse.
- Created and optimized complex SQL queries in **GCP BigQuery** to drive advanced customer segmentation, campaign performance analyses, and loyalty and subscriptions program insights.
- Identified growth areas through understanding business processes, focusing on Marketing's ad-hoc analyses including campaign performance, loyalty programs, and migration rates.
- Built cohort- and segment-based analyses of customer behavior, tracking retention, churn, and lifetime value (LTV) to inform loyalty program and campaign strategy, and supported A/B test design and statistical interpretation for marketing experiments.
- Trained in Looker Studio BI tool; built performance reporting and BAU dashboards using **LookML** and presented to internal stakeholders.
- Designed and implemented data models within GCP environments, supporting scalable analytics solutions and enabling data pipelines and automated dashboards using **Fivetran**.
- Conducted end-user training to enable interaction with data using the Looker BI platform, primarily supporting Customer Analytics and Marketing Analytics to drive business growth.

Data Application Analyst | *Harvest Financial Services, Dublin, Ireland*

Sep 2020 – Dec 2020

- Gathered data from multiple applications and posted cleaned, transformed data as data feeds into the system.
- Independently extracted and developed reports for operations and reporting teams by constructing SQL stored procedures, functions, and **SSRS** reports under the reporting lifecycle.
- Used **Power BI** to visualize monthly reporting of asset valuation and customer growth for Harvest Financial Services.
- Developed Master distribution reports using Advanced Excel and SQL for funds liquidity and distributions.
- Built domain knowledge of Irish finance including ARF, PRF, AMRF, Pensions, Ledger, and Investments.

System Engineer | *Tata Consultancy Services, Pune, India*

Jun 2016 – Jul 2019

- Led a team focused on data modeling, data acquisition, reporting, and product support, managing the full analytics lifecycle from requirements gathering to implementation.
- Designed and developed KPI dashboards using **Tableau**, **Python**, and **SQL**, tracking SLA and OLA compliance globally.
- Conducted ad hoc analysis using Python (pandas, matplotlib, seaborn, scikit-learn) to support data-driven decision-making.
- Created Tableau dashboards for consumer banking executive reporting; extracted ad-hoc reports from SQL databases and developed RDBMS environments using SQL, T-SQL, and PL/SQL.
- Designed process maps, data flow diagrams, and report specifications using **MS Visio** to communicate project requirements.
- Embedded Tableau reports into C# web forms and implemented custom pages and SQL backend updates for a custom application.
- Created and maintained database objects (tables, views, stored procedures) using **T-SQL**, writing efficient queries and stored procedures for SSRS reports.
- Gained experience with **SSIS** for data integration and pipeline automation.

SKILLS

Programming & Technology: C#, R, Python (data science, data mining, machine learning, statistical modeling), Data Architecture, Database Design

Databases: SQL Server, Oracle 11g, PostgreSQL

Cloud Platforms: GCP, AWS

Data Analysis & BI: Tableau, Power BI, Looker, LookML, Advanced Excel, IBM SPSS, RapidMiner, R Studio, XLMiner, Solver, Google Analytics, Qlik Sense, QlikView, Google Data Studio, Clevertap, Mixpanel, Metabase, GSuite

Design: HTML5, CSS3, jQuery, Adobe Illustrator, MS PowerPoint, SharePoint

RPA Tools: UiPath

Methodologies & Tools: Agile Scrum, JIRA, Eclipse, Visual Studio, Jupyter Notebook, MS Visio, JSON, XML, SSIS/SSRS, SAP Business Objects, Trello

Version Control: Git, Tortoise SVN, GitLab

ITSM Tools: ServiceNow, BMC Remedy

Core Strengths: Stakeholder management, cross-functional collaboration, analytical thinking, project management, communication & presentation, time management, continuous improvement

EDUCATION

MSc in Business Analytics

National University of Ireland, Galway, Ireland • Sept 2019 – Aug 2020

Result: 2:1

B.Tech in Electronics and Telecommunication

Institute of Technical Education & Research, Bhubaneswar, Odisha, India • Jul 2012 – May 2016

Result: 72.8% – First Class with Honours

ACADEMIC PROJECTS

- **Predictive Analytics** in the Tourism and Hospitality sector in Ireland using Python, R, Tableau, Exploratory.io, and Power BI.
- Built a **predictive model** using machine learning to predict the outcome of H1B visa applications in the US for non-immigrant workers, in Python.
- **Ethereum price prediction** using an ARIMA model.
- Sentiment analysis using advanced NLP in Python via web scraping data from TripAdvisor, and creation of a content-based recommendation engine distinct from the existing system.
- **Customer profiling and market basket segmentation** based on average order value, average order frequency, demographics, psychographics, and geography, using live POS and CX survey data from a European retailer, in Python and Excel.

AWARDS & ACHIEVEMENTS

- **On the Spot Award**, FY2016–17 — for excellent client communication and completing tasks with high quality and strong performance.
- **Star of the Month Award**, FY2016–17 — for outstanding contribution to a project that improved existing forecasting, increasing yearly profits by 7%.

CERTIFICATIONS, VOLUNTEERING & INTERNSHIPS

- Certified SAP BW on HANA, Brandenburg University of Applied Sciences
- Google Analytics for Advanced Certification
- Scrum Foundation Professional Certificate, CertProf
- freeCodeCamp.org - Data Analysis with Python, certified
- IBM Design Thinking Practitioner
- Microsoft Certified: Azure Data Scientist
- Astronomer: Apache Airflow 3 Fundamentals, Astronomer Certification DAG Authoring for Apache Airflow 3
- Data Engineer Associate, Data Camp
- Member, Business Analytics Society and NUI Entrepreneur Society at NUI Galway
